Known for our responsible production, with the greatest respect for nature, we guarantee you the careful selection of our goose down and feathers for our pillows and duvet covers, which have been used as the perfect filling for centuries. The small air pockets between the individual hairs ensure optimum insulation. A mix of feather and down is used to give the ideal balance of weight and warmth. This rich layer of warmth offers an optimal night's sleep.

We are offering you 3 different editions of pillows, single chamber or 3 chamber, from soft to firm. As well as 2 editions of duvets, a summer and an all-season edition. The larger pockets of our all season duvet, ensure more insulation and comfort due to the bigger air-pockets. The duvets have buttons on the corners to attach it to the duvet cover.
